EXPERIENCE

Graduate Research Assistant, Seoul National University — Sep 2025–Present
With Prof. Bongwon Suh, Human-Centered Computing Lab

- Designed a conversational memory system that organizes long-term conversations into episodes while preserving raw dialogue, evaluated on three long-term conversation benchmarks. *Under review at ARR.*
- Developed an interactive writing interface that visualizes character tone to help writers maintain narrative consistency across long texts; evaluated it with 16 writers. *Poster at UIST 2026.*

Research Intern, Seoul National University — Mar 2025–Apr 2026
With Prof. Hajin Lim

- Introduced experiential deepfake simulation anchored in Protection Motivation Theory to evaluate personalized threat perception; designed and evaluated the framework with 21 older adults. *Published at CHI 2026.*

Research Intern, KAIST Jan 2025–Sep 2025

With Prof. Juho Kim, KAIST Interaction Lab

- Analyzed 14,863 student–AI interaction logs from real EFL classrooms, combining qualitative coding with log analysis to examine process-level variations beyond final writing outcomes. *Published at CHI 2026, Best Paper Award.*

Research Intern, Seoul National University Sep 2024–Dec 2024

With Prof. Nojun Kwak, Machine Intelligence and Pattern Analysis Lab

- Studied neural rendering (NeRF, 3D Gaussian Splatting) and diffusion-based image and video generation and editing.

Research Intern, Seoul National University Dec 2023–Feb 2024

With Prof. Bongwon Suh, Human-Centered Computing Lab

- Fine-tuned a localized large language model (Polyglot-Ko) via LoRA on multi-turn dialogue datasets to capture task-specific interaction context.

TEACHING

Teaching Assistant, Digital Forensics Practicum, SNU Summer 2026

RESEARCH PROJECTS

ETRI: PII Leakage Benchmark for LLMs 2026

Benchmark evaluating whether fine-tuned LLMs leak personally identifiable information from their training data.
My role: designed the evaluation, including the definition of leakage and control conditions that separate memorization from pretraining priors.

Interactive 3D CT Segmentation Tool [code] 2024

Capstone project with INFINITT Healthcare (team of 3) adding organ segmentation to an open-source 3D DICOM viewer.
My role: integrated LiteMedSAM into the viewer so that users can segment organs on CT scans with bounding-box prompts, and fine-tuned it on CT data.

OTHER PROJECTS

Voice-Based Autobiographical Service [code] 2024

Built and deployed a voice-based autobiography service that guides users through pivotal life changes. Grand Prize, KAIST Social Impact Challenge.

Real-time writing support through RAG 2023

Designed and deployed a real-time source recommendation system for writers using RAG and PineCone Database.

AWARDS

Best Paper Award, ACM CHI 2026

Grand Prize, KAIST Social Impact Challenge 2024

Top 10 Finalist, Upstage AI Innovation Challenge 2024
